### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The introduction of an overcurrent responsive disconnection device of any type connected between the ground and neutral conductors of a building power distribution system is not taught or fairly suggested by the prior art of record. The prior art teaches that it is important for grounding circuits to remain connected at all times for safety reasons related to electrocution hazards. In all known power systems, substantial current flows in lines connecting grounds and neutrals only during fault events and must continue to flow to operate conventionally connected protection devices.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen W Jackson whose telephone number is 571-272-2051. The examiner can normally be reached on 6:30am-3:00pm M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Sircus can be reached on 571-272-2800 x36. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
